[REDACTED] M.D.

Dear Dr. [REDACTED]

RE: Double Blind 6 Week Study Comparing Fluoxetine in Fixed Doses
to Placebo in the Treatment of Patients with Major Depression
(IRB Control [REDACTED])

This letter acknowledges receipt of your correspondence of June 26,
1985 requesting an amendment to the above listed study to delete the
10 mg dose, leaving only 5 mg, 20 mg and 40 mg dose capsules.

This letter will also serve as official Institutional Review Board
approval for this amendment. Please revise the consent document
accordingly and submit copy to the IRB office for inclusion in the
study file.

Sincerely yours,

[REDACTED]
Chairman, Institutional Review Board
